

# STUDENT HANDOUT

## Post Activity

REFLECTION: Review the worksheets for the 3 parts of the field trip. Then answer the following question: ***In what ways to deer impact us and the environment we live in?***

Use the graphic organizer provided to formulate your answer and support it with evidence.

### Create your explanation

Write a brief summary of the 3 parts of your investigation. You will use this summary as an introduction to your explanation.

**Claim** – a statement of what you think will happen or understand in your investigation

**Evidence** – data collected during investigations and trends in that data.

**Science knowledge** – knowledge about how things work. You may have learned this through reading, talking to an expert, discussion or other experiences.

**Conclusion** – Write a few sentences summarizing what your investigation has taught you.
